

```
# This is our first dockerfile
FROM nginx:latest

LABEL maintainer="kalyan.m@gmail.com"

RUN yum update -y && yum install -y httpd net-tools
RUN mkdir -p /run/httpd
RUN rm -rf /run/http/* /tmp/httpd*

CMD echo "This is a Dockerfile test message"

ENV ENVIRONMENT="production"

EXPOSE 80

CMD [ "-D", "FOREGROUND" ]

ENTRYPOINT [ "apachectl" ]

#[ This means we are asking apache , which normally runs in
background, to run in foreground ]
```
